ACKNOWLEDGEMENT

We would like express our deepest gratitude to the following people who have contributed to the development and completion of this research paper: Sir Jon Cruz as our Programming Adviser where he gave us valuable insights throughout the course of development of the website and for also suggesting content inside the website; Ma'am Tin Corpuz for being our research paper Teacher/Adviser Where she guided us in writing our research paper; Sir Jomar Soliman for being one of the Panellists in our defence where he gave us constructive feedback which we used to make the quality of our output better.

We would also like to give our gratitude to Shaina Rose Tandang for her assistance in providing valuable information about the media club. Additionally, we would like to show appreciation to Colegio De Los Baños, the school that provided the study materials for the research and where the research was conducted.

Lastly we would like to give our sincerest appreciation to the respondents which are the officers of the club who gave their time to give insights and suggestions which made the outcome of the research possible and also the outcome of the website much better.

ABSTRACT

RESEARCH TITLE: DEVELOPMENT OF WEBSITE FOR THE SCHOOLS

PUBLICATION OF COLEGIO DE LOS BAÑOS

RESEARCHER/S: DUMAGCO, ANTONIO JOAQUIN, SUIZA

REBOTON, JUSTIN ADRIAN, POLICARPIO

SALEN JR., VIC JOHN, OBOZA

SCHOOL YEAR: 2023-2024

STRAND: INFORMATION COMMUNICATION TECHNOLOGY

▪ The developers came up with the idea of a website for the schools publication to have an organized and usable website for the media club. The developers are also part of the said club. Currently, the media club consists of around 45 members where 10 of them are the officers and 4 club advisers. The media club currently posts content on Facebook and the posted content isn't organized by category. The Developers used VS Code to program their website using their laptops. They developed the website and tested it with the panellists and media club officers, where the results turned out good and they received a lot of good feedback. the researchers made some changes to their website that is user friendly, organized, and easy to use website for the students, teachers and for the media club members

CHAPTER I

THE PROBLEM AND ITS BACKGROUND

The topic that the researchers chose is “Development of News Website for the Schools Publication of Colegio de Los Baños.” News publication is one of the ways to gain information about what is happening in an area may it be locally or internationally, smaller areas such as schools have also adapted to this form of public communication to give their students and faculty members information about the recent events that have happened in the area. While traditional school publications have utilized digital forms like social media, there remains a challenge just by solely using social media such as Facebook being unorganized.

The solution that the researchers proposed is to develop a website for the school publication accessible online. Unlike normal approaches, this online news platform will not only provide information about the latest events within Colegio de Los Baños but will also ensure accessibility for all students and faculty members, irrespective of their internet connectivity. The website will serve as a centralized hub for news and events, promoting a more organized and efficient means of communication within the school community.

The reason why the researchers chose this topic is that students and teachers want to establish a more accessible and organized source of news for Colegio de Los Baños. This platform aims to surpass the limitations of relying solely on social media platforms like Facebook, providing a dedicated space for reliable and up-to-date information about the school's activities.

Statement of the Problem

This research study aims to develop a functional news website for Colegio de Los Baños. It will also show how it will help students within the said school.

Specifically, this study aims to answer the following questions:

1. What hardware and software should be employed in developing the news website for CDLB?
2. What are the essential tools required for the development of the news website?
3. What content and information are essential for ensuring the website operates effectively?
4. How can this website be accessible and helpful for the students of Colegio de Los Baños?
5. How can the news website be designed to enhance accessibility and usability for Colegio de Los Baños students and teachers?

Significance of the Study

The significance of this research is to create a website for the CDLB's news publication Media Club that can be accessed online. This is important as it contains the information needed to keep up on what is happening inside and occasionally outside the school. It is also the way to help the students that do not have any internet connection as it is available and accessible when connected to the schools free Internet.

The people who will benefit from this website would be the visitors such as students and faculty members, as they would engage in a more organized and sorted source of essential information about the events at school. The club members and its advisers would also benefit from this as

✉ cdlb1994@yahoo.com

📘 [CDLBOfficial](#)

they would be less dependent on only posting the articles and other posts on social media, specifically Facebook.

Purpose, Scope, Objectives

Table 1: Purpose, Scope, and Objectives

Purpose	The purpose of this research study is to provide a more accessible and sorted source of local news inside the school, specifically for Colegio de Los Baños, through the development of a dedicated news website.
Scope	This research holds the creation of a functional news website, accessible via the internet, and focuses on defining the necessary content, technical aspects, programming languages / mark-up / database, and tools required for its development.
Objectives	The specific objectives include developing the news website with an intuitive interface, selecting appropriate programming languages / mark-up / database and tools, managing website content effectively, and enhancing its accessibility for students and faculty members within Colegio de Los Baños. This will improve communication and information spreading within the school community.

CHAPTER II

REVIEW OF RELATED LITERATURE

Following an in-depth search by the researchers, this chapter comprises the associated literature and studies. Those provided in this chapter assist in becoming acquainted with the knowledge important to study.

System Literature

Website

A website is a collection of connected online pages that share a similar domain name and are hosted on at least one web server. These pages are often linked together by hyperlinks and may include a range of multimedia components such as text, photos, videos, and interactive applications.

News Publication

News publication is a vital medium for disseminating information about current events, both locally and internationally. It serves as a source of news and updates, keeping individuals informed about developments in various fields, including politics, sports, entertainment, and more.

Current State

The Colegio de Los Baños Media Club, which was founded in May 2023, has taken the effort to solve this issue. The group has about forty members, including ten officers and four devoted faculty members who aid. The club members have received instruction from clubs and organizations outside the university, such as the UPLB Jocks and LB Times. The main goal of the project is to develop a user-friendly news portal that can be accessed online, making it possible for all students and teachers to be informed about events and news at the school. The goal of this initiative is to improve communication and information sharing within Colegio de Los Baños by giving the community a more streamlined and user-friendly information source.

Business Process

a) Current Process

Currently the Colegio De Los Baños Media Club mainly publishes their content via the social media site of Facebook which may not be effective to students, teachers, and other visitors of the website because it has the problem of not being organized which can be a hassle.

b) Proposed Process

The researchers offer a proposal and solution to this problem by building a website for the club, that specify its goals and conditions. The construction of websites, programming languages / mark-up / database, and tools are the main topics of the design and development phase. The website will be deployed and hosted, enabling online access to anyone connected to the internet. Members and advisors of Colegio de Los Baños Media Club are equipped to operate the platform thanks to training and documentation. Strategies for expansion and future planning are considered, assuring the project's long-term success.

Proposed System

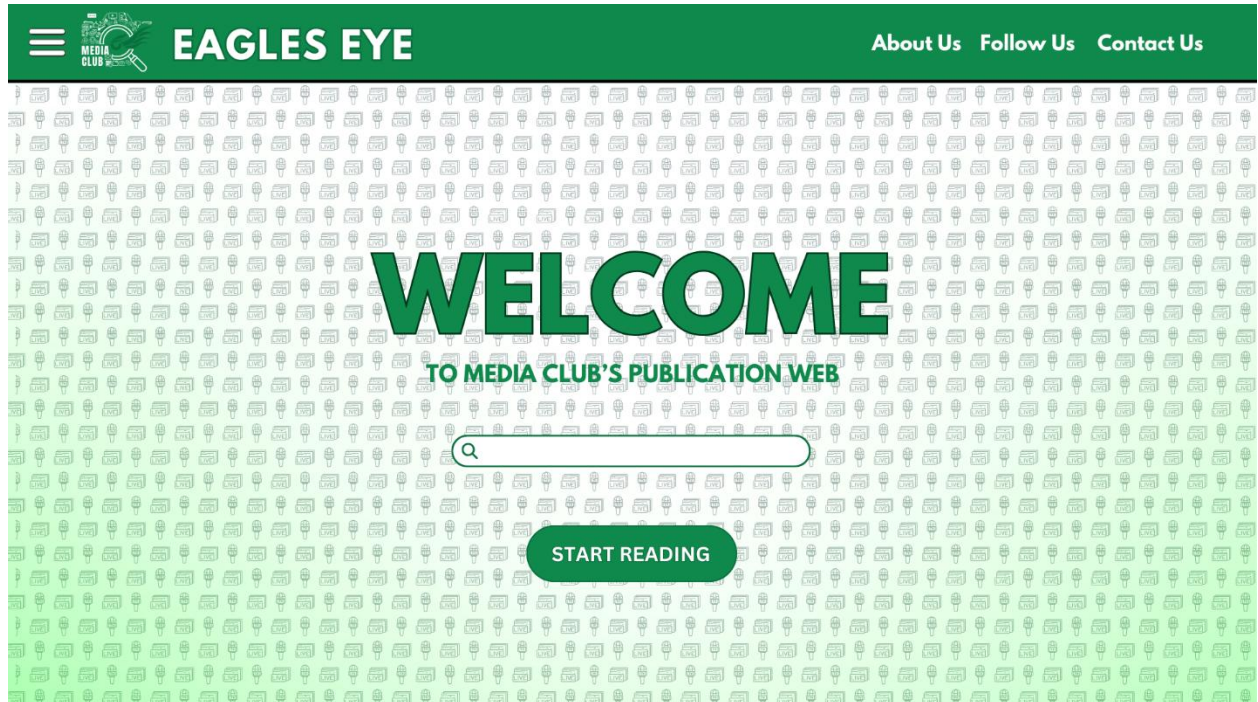

Figure 10: Proposed System

The developers took inspiration for this website's design from numerous news websites to create a style that emphasizes clarity and organization, delivering an excellent reading experience for our audience. The developers used the eye-catching color green as an homage to our school's identity, which not only produces a visually attractive aesthetic but also establishes a connection with our institution. The inclusion of a warm welcome paragraph on the site greets and engages readers, establishing a pleasant and inviting tone. Prioritizing readability, and have been carefully picked fonts, widths, and spacing to improve the overall user experience, in accordance with best practices in news website design. The websites navigation layout is simple, allowing visitors to easily navigate between sections and content.

Definition of Terms

- **Accessibility** - A crucial aspect of any news website design, ensuring that the website is usable and navigable for all users, including those with disabilities.
- **Centralized Hub** - A single, central location or point that serves as a focal point for specific activities, functions, or information.
- **Computer Hardware** - Physical parts of a computer such as the case, keyboard, or speaker.
- **Computer Software** - A set of data or programs used to operate computers and execute specific tasks.
- **External Interface** - The interaction and communication between the club adviser, admin, users, and guests regarding the supervision, maintenance, and access to the news website.
- **HTML (Hypertext Markup Language)** - the standard language used to create and format documents on the World Wide Web.
- **Internal Interface** - The interaction and communication between researchers/developers and the client or advisor in the process of proposing, developing, and presenting the news website.
- **Server** - A computer or system that stores and serves data, resources, or services to other devices, often over a network.
- **Streamlined** - to make a business, process, activity, etc. simpler and more effective.

- **URL (Uniform Resource Locator)**- Uniform Resource Locator; a web address that specifies the location of a resource on the internet, including the protocol (e.g., http://) and the domain.
- **Visual Studio Code (VSC)** – A lightweight source code editor that can handle multiple programming languages which is made by Microsoft compatible with Windows, MacOS, and Linux
- **Web Browser** - A software application used to access and display websites, enabling users to navigate and interact with the web.
- **Web page** - A document or file accessible on the internet, typically written in HTML, containing text, images, and links.
- **Website** - A collection of connected online pages that share a similar domain name and are hosted on at least one web server.
- **WordPress** - A popular content management system (CMS) for creating websites and blogs, known for its flexibility and ease of use.

CHAPTER III

METHODOLOGY

Phases of Development

Planning

The developers, being part of the Media Club, come up with the idea to provide a more accessible and sorted source of local news inside the school and enhance the club's discovery by creating a website. This move was aimed at supporting the club's growth.

Coding

The developers utilized computers and software. They employed laptops and desktop computers for coding, using HTML, CSS, JavaScript, PHP, and SQL and for software like Visual Studio Code and web browsers such as Microsoft Edge, Google Chrome, or Opera.

Testing

The website testing process, was tested by Mr. Rogelio M. Cruz Jr. and Mrs. Tin Corpuz, they encompassed a thorough examination of functionality, inspecting different types of elements. During the testing sessions, the expert developers provided suggestions such as increasing font size and refining buttons. These sessions took place in person at the school after we finished our prototype coding phase.

☎ 0495361977 / 09215457118

✉ cdlb1994@yahoo.com

📘 CDLBOfficial

Implementation

The developers chose to host the website on a local server or local area network to implement the website. Club officers were given access to serve as administrators, update the website content, and also view or read it as regular users or guests. Concurrently, users and guests were able to view the updated content. Additionally, the officers provided valuable feedback and suggestions verbally.

Evaluation

All Media Club officers thoroughly reviewed the website's components, functionalities, and overall presentation. Each officer looked at different areas, such as design aesthetics, user interface intuitiveness, content relevancy, and technical performance. Following the implementation, we personally provided them with our evaluation paper/instrument for their feedback.

Program Development

Throughout the website development process, the researchers will rely on a combination of software and hardware. Hardware requirements include laptops, desktop computers from the school's computer lab for testing, and a Wi-Fi router for hosting the site. Software essentials consist of Visual Studio Code for coding and web browsers for website output monitoring.

Software Requirements:

- **Database Management System (DBMS):** Required for managing and storing data efficiently. MySQL or SQLite could be suitable choices.
- **Visual Studio Code (VSC):** A lightweight source code editor compatible with multiple programming languages / mark-up / database, including HTML, CSS, JavaScript, PHP, and SQL.
- **Web Browsers** (e.g., Microsoft Edge, Google Chrome, Opera): Essential for testing and monitoring the output of the website during development.
- **Programming Languages / Mark-up / Database:**
 - **CSS (Cascading Style Sheets):** Used for styling and formatting the visual presentation of the website.
 - **HTML (Hypertext Markup Language):** Standard language for creating and formatting documents on the World Wide Web.
 - **JavaScript:** Enhances interactivity and responsiveness of the website.
 - **PHP (Hypertext Preprocessor):** Enables back-end functionalities and dynamic content generation.
 - **SQL (Structured Query Language):** Used for managing and querying databases.

Hardware Requirements:

- **Laptops and Desktop Computers:** Utilized for coding, testing, and development activities.

- **Server:** A computer or system that stores and serves data, crucial for hosting the website locally.

Evaluation Instrument

Are there engaging and interactive elements on the website?					
Provide any additional comments or suggestions you have about the website's interface and functions. Share your thoughts on what could be improved or what works well.					

Project Deliverables

Table 6: Project Deliverables

Date	Deliverables
August 22, 2023	Brainstorming
September 15-19, 2023	Went to the school's library to look for references. Discussed the research paper's purpose, scope, objectives. Begun drafting chapter I. Consulted with a subject matter expert or academic advisor to refine the research topic and approach.
September 22 - 29, 2023	Chapter I was approved. Started gathering information for the chapter II. Conducted an interview with the client. Collected all data and begun drafting chapter II.
October 13 - 20, 2023	Consulted with a subject matter expert or academic advisor to refine the research topic and approach. Chapter II was approved.

	Went to the school's library to look for references. Begun drafting chapter III.
October 24, 2023 – November 11, 2023	Revised the chapter I and II Revising the papers.
January 15 - 19, 2024	Final consultation for Chapter I - II. Started the coding.
January 22, 2024 - February 2, 2024	Review of Chapter IV. Consultation and Coding.
February 5 - 23	Continue coding. Consultation to the panelists and adviser. Started writing Chapter IV.
March 4 - 15, 2024	Checking of Chapter IV. Writing of Chapter V.
March 19, 2024	Submitted Chapter IV and V.
April 11, 2024 - Present	Final defense. Revisions of paper. Submitted the final paper.

Project Methodology

Figure 13: Project Methodology

The News Website System Architecture for Colegio de Los Baños Media Club will be designed to provide a user-friendly and accessible platform for the students and teachers. The front-end development includes HTML and CSS for structure and style, with JavaScript enhancing interactivity. PHP and SQL are employed for back-end functionalities, facilitating dynamic content generation and efficient database management. Administrative control is centralized through administrator accounts, managing content management and system security. The database stores news articles and associated data. Rigorous testing and evaluation tools will be

System Development

This system development describes the expected user experience for the website of Media Club, a news publication club. It serves visitors and administrators as its two main user groups.

Through the homepage and simple navigation, visitors can examine what the website has to offer. Administrators have the ability to modify, add, or remove articles as well as alter the admin password.

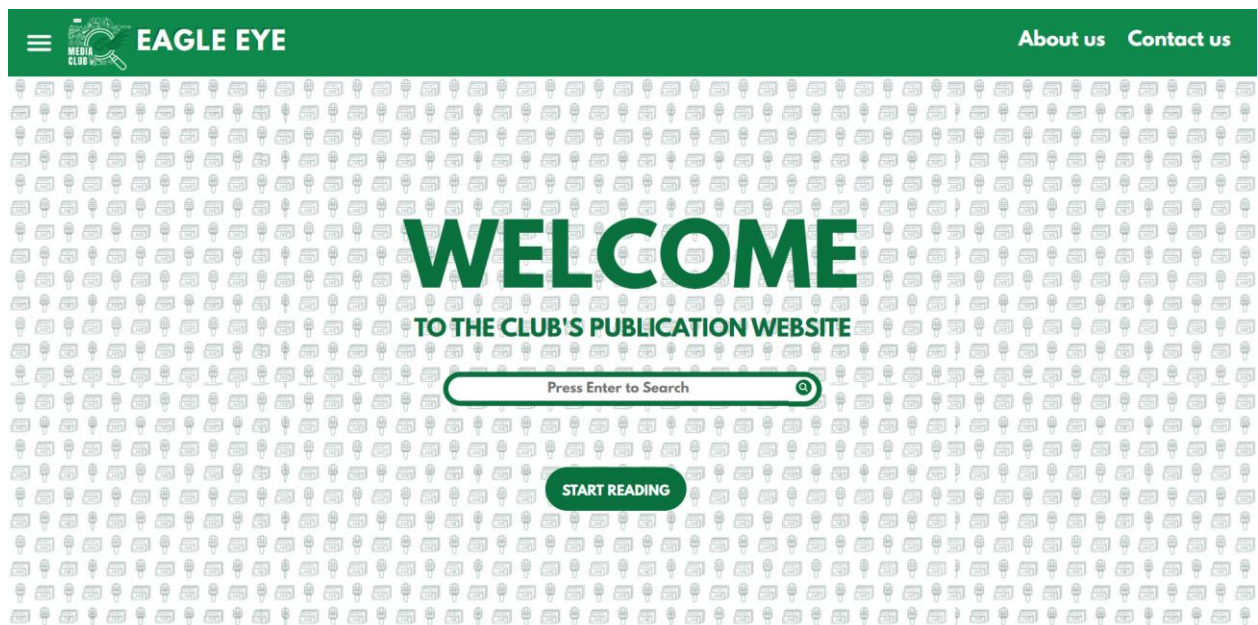

Figure 18: Guest / Reader Side Homepage

Upon entering the website as the reader, the reader will be led to the home page, as shown in Figure 18, where all visitors will be treated as guests. The top portion includes a navigation bar that allows users to quickly go to different sections of the website by selecting the menu button, which covers news categories such as school news, academics, sports, and events. A search button is also available, which searches headlines, author, category, and date published.

Login

Username

Password

Login

Figure 19: Administration login page

While entering the website as the admin or super admin, they will be given a different link and will be led to the login page as shown in figure 19. Administrators can access the system using the username "Admin" and the default password "MediaClubAdmin" and for the username "SuAdmin" in short for Super Admin and the default password "MCAdmin". This concept is inspired by typical WiFi routers, which frequently have limited default profiles.

The screenshot shows a web-based form for creating a new article. The form is set against a light blue background with a repeating pattern of small lightbulb icons. At the top, there is a section labeled 'Headline:' with a large text input field below it. Below the headline field, there are three smaller input fields: 'Author:' with a placeholder 'Name of Author', 'Category:' with a dropdown menu currently showing 'News', and 'Date Published:' with a date picker showing 'mm/dd/yyyy'. Below these fields are two large text areas for the article body, labeled '1st Paragraph' and '2nd Paragraph'. Under the second paragraph area, there are six small buttons stacked vertically, labeled 'Add 3rd Paragraph', 'Add 4th Paragraph', 'Add 5th Paragraph', 'Add 6th Paragraph', 'Add 7th Paragraph', and 'Add 8th Paragraph'. At the bottom right of the form is a green button labeled 'Publish'.

Figure 27: When administrators click the “Create” button.

The display screen showing when the administrator presses create button is shown in figure 27. An administrator is required to fill out information such as heading, author, category and date of publication, in addition to body content for paragraphs 8. When the administrator is done with writing the article, the admin can now publish the article by pressing the "Publish" button that is displayed.

2nd Paragraph

3rd Paragraph

4th Paragraph

Figure 28: When administrators click the edit button.

The input forms on the "Edit Article" page, which are identical to the design in Figure 27, are already filled in with the article's current content. Along with these fields, an "Edit" button replaces "Publish," allowing the administrator to finish the article's edits. After clicking the "Edit" button, the administrator will be asked if they want to edit or cancel.

On administrator's home pages (figure 21 and 22), alongside the list of articles and their respective details, including author, category, and publication date, a "Delete" button is displayed for each article. When the admin selects the "Delete" button for a specific article, a confirmation message appears, asking, "Are you sure you want to delete this article?" This ensures that administrators can confirm their intent before permanently removing the article from the database.

WHAT WE DO

What the media mainly does is to update the students, faculty, and personnel of CDLB and people who are interested in Colegio de Los Baños events that happened within the schools and sometimes outside the school like outdoor activities of strands with the use of social media. We post mostly articles, videos, and a gallery of photos to show the events that happened.

CLUB HISTORY

The CDLB Media club is currently a newly established club in Colegio de Los Baños (CDLB), established in the 4th of May 2023. The club was created along with the one of the first club advisers right after they attended the Gandingan Awards which gave them the idea to create a club. Now the club has 43 members along with 4 club advisers where they effectively run and manage the club.

After officially launching the club, the club members have collaborated with two organizations from the University of the Philippines - Diliman, UPLB Jocks which trained the club members about broadcasting and the UPLB Times which trained the members about journalism.

evaluated questions contain about the visual appeal, responsiveness, and the navigation efficiency.

CHAPTER V

SUMMARY, CONCLUSIONS, AND RECOMMENDATION

Summary

This Study Aimed to create and develop a news website for the media club of Colegio de Los Baños (CDLB). The website is intended to provide news and information to the students and faculty members of the school. The system was tested by Ms. Tin Corpuz, Mr. Jon Cruz, and the officers of the media club. The officers also evaluated the system which gave the developers useful data and recommendations about the system. The respondents gave high ratings for the website which indicates a positive impression making the evaluation successful. The results of the evaluation were successful as there were 24 highest marks (5) and there were only 6 high marks (4). The website in general was found to be visually appealing and efficient to navigate.

Conclusions

Through the research, the study on a news website as a platform dedicated to show up to date news and information and its features. These features include publication of information of the things that happened in the events inside the school and a user-friendly interface to reduce confusion on the functions of the website.

The study explored the process of developing a news website focusing on web design, organization of content, optimizing user interface and user experience as well as backend

development. Its goal is to provide insights and ideas to consider for a successful development of such a platform.

In addition, after the officers of the club evaluated the website for the club's use, they were satisfied with the outcome of the website and gave suggestions for the improvement of the UI but nevertheless the website can be used to make the publications more organized and manageable.

Additionally, the research found the use of optimal markup languages and programming languages suitable for developing a news website. Based on the study, the website was developed using HTML and CSS for the markup languages while PHP is for the programming language part of the development. These Languages were chosen for the websites interactive and dynamic pages.

In addition, it is imperative to know that despite the development and designs of the news website for the CDLB media club, the study encountered a problem in some of the features and implementation. Unfortunately, the ability to upload pictures and videos were not applied as the developers faced some troubles trying to apply this feature and the website was not hosted online holding back its full potential to become the full source of news for the people of CDLB.

Nonetheless, this research has contributed to the understandings and the concepts of web development in developing a news website. While providing valuable insights and information

Recommendations

For the recommendation to improve the CDLB Media Club website, the developers recommend the following actions:

1. Host the website through a paid web hosting provider to give access to users online for better security and elimination of ads on the website.
2. Improve the security and verification at the change password admin by adding Old Password, New Password, and Repeat Password for verification.

By implementing these recommendations, the CDLB media club can provide a better experience for its users and visitors.
